

**Dear Servo Hobbyist,**

Enclosed you'll find finally the promised UHU Servo Controller Rel. 3.00. I hope that everything works as well with your setup as it did in our own intense tests.

You can download the documentation package  
**<http://www.uhu-servo.de>**

All important information should be found there. I tried to do it in proper English, but please be clement if you find errors. It's not at all my native language....

Now I have shipped more than 1.500 controllers. This implies that I am unable to give personal support to all of you. If you are able to read German texts, visit the forum "Peters CNC Ecke" at <http://5128.rapidforum.com> . Register and search for "UHU Servocontroller". You'll find some huge threads with almost all sort of helpful ideas.

I don't distribute the servo controller on a commercial base, but I have to come back on the money I have to pay for the chips, envelops and postage. Therefore I have to take at least 2.50 USD for each controller, 1 USD for each crystal (if ordered) and whatever the snail mail steals out of my pockets for postage.

Every bit more is just your appreciation of the work I've put in for programming the chips, burning and handling. That's what I call my "BeerWare philosophy". A bottle of your favorite local beer or anything else of at least this value is the minimum I should get from you for each controller. Beer is just a place holder here: I certainly can make use of almost any tools in my hobby workshop (drills, reamers, end mills, thread cutters etc.) and I am a big fan of hot sauces and hot&spicy snacks. And I love to unpack surprises... Those who surrender from cost of shipment can also send me some additional money which directly goes into my workshop piggybank. A rough figure could be 5 to 10 USD per controller.

For those who want to send me a nice surprise or some banknotes, my address:

**Uli Huber  
Bettingerstr. 4  
82515 Wolfratshausen  
GERMANY**

For money transfers within the European Union my bank account information:

**Raiffeisenbank München Süd  
IBAN DE05 7016 9466 0000 3021 04  
BIC GENODEF1M03**

For all internationals who don't want to send cash by mail, the best solution is Paypal.

If your Paypal account is based on bank transfers, please use [uli@uhu-servo.de](mailto:uli@uhu-servo.de)

If your Paypal account is based on credit card payments, please use [creditcard@uhu-servo.de](mailto:creditcard@uhu-servo.de)

Be aware that Paypal takes about 6% from all credit card and foreign currency payments I get in.

**Important: Please do not send any payments without checking if controllers are available !**

Have fun and success with your servo project!

Uli Huber

Please note:

***Attention: Machines, particularly those with automated controls and devices with high voltages are potentially dangerous.***

***Due to legal reasons, the UHU-Servocontroller is intended only for innocuous demonstration setups. The control of machines with the UHU-Servocontroller underlies the personal responsibility of the user as long as it is not explicitly approved for an individual setup in a written statement.***

***Any responsibility or warrantees are expressly excluded.***

***By using the UHU Servo Controller you agree to these terms.***
